TIME

Family Note Today your child learned about “fact power,” or the ability to solve multiplication facts quickly and easily. Children practiced developing fact power by playing a multiplication game called *Beat the Calculator*. You can help your child develop fact power by playing multiplication fact games and practicing with Fact Triangles at home.

Please return this Home Link to school tomorrow.

- ① Choose a way to practice multiplication facts from the list of activities below:

Beat the Calculator Fact Triangle practice *Salute!*

- ② Use the activity you chose to practice your multiplication facts with someone at home.
- ③ In the boxes below, record six facts for which you have “fact power.”

- ④ Record one fact that you are still practicing or that you think might be challenging for someone else. Show how you can figure it out efficiently. Explain your strategy to someone at home.
